in today's technology driven environment there is an ever increasing demand for information delivery a compromise has to be struck between security and availability this

book is a pragmatic guide to information assurance for both business professionals and technical experts

as breaches in information security continue to make headline news it is becoming increasingly clear that technological solutions are not the only answer the authors outline the main management principles designed to help secure data and raise awareness of the issues involved

cyber security foundations introduces the core topics that all cyber security students and future professionals need to understand the cyber security landscape it is a key textbook for postgraduate and undergraduate students taking modules related to cyber security and information security as well as for general readers seeking to deepen their understanding of technical and human centred digital security concepts features include chapters on core areas such as cryptography computer security cyber security management cybercrime and privacy informed by the cybok knowledge areas demonstration of how the many facets of the discipline interrelate allowing readers to gain a comprehensive understanding of the cyber security landscape real world examples to illustrate the application of ideas learning outcomes and activities to help reinforce learning and exploration beyond the core text and a glossary to equip readers with the language necessary to make sense of each topic

understanding cybersecurity principles and practices is vital to all users of it systems and services and is particularly relevant in an organizational setting where the lack of security awareness and compliance amongst staff is the root cause of many incidents and breaches if these are to be addressed there needs to be adequate support and provision for related training and education in order to ensure that staff know what is expected of them and have the necessary skills to follow through cybersecurity education for awareness and compliance explores frameworks and models for teaching cybersecurity literacy in order to deliver effective training and compliance to organizational staff so that they have a clear understanding of what security education is the elements required to achieve it and the means by which to link it to the wider goal of good security behavior split across four thematic sections considering the needs of users organizations academia and the profession respectively the chapters will collectively identify and address the multiple perspectives from which action is required this book is ideally designed for it consultants and specialist staff including chief

information security officers managers trainers and organizations

until recently if it has been considered at all in the context of business continuity cyber security may have been thought of in terms of disaster recovery and little else recent events have shown that cyber attacks are now an everyday occurrence and it is becoming clear that the impact of these can have devastating effects on organizations whether large or small public or private sector cyber security is one aspect of information security since the impacts or consequences of a cyber attack will inevitably damage one or more of the three pillars of information security the confidentiality integrity or availability of an organization's information assets the main difference between information security and cyber security is that while information security deals with all types of information assets cyber security deals purely with those which are accessible by means of interconnected electronic networks including the internet many responsible organizations now have robust information security business continuity and disaster recovery programs in place and it is not the intention of this book to re write those but to inform organizations about the kind of precautions they should take to stave off successful cyber attacks and how they should deal with them when they arise in order to protect the day to day businesses
